

Table of Submission to Draft Waste Management and Minimisation Plan 2025 – 2031

Thank you to all 79 submitters and those who wish to speak at the hearing on 27 August 2025

Council asked the community for feedback on the following consultation topics:

- 1. Your Household
  - a. How many people in your household?
  - b. The Draft Waste Management and Minimisation Plan is looking at ways to reduce waste being created and sent to landfill, with actions aimed at increasing the amount of waste we can divert through recycling or reusing. Overall, the goal is to keep resources in circulation and minimise harm and impact to our environment and community from waste. What do you think of this direction?
  - c. What is most important to you and your household?
- 2. Recycling
  - a. Select what items can be recycled at your kerbside.  
NB: Kerbside collections = Plastic 1, 2, 5; Glass bottles and jars; Cardboard, Tins and Aluminium
  - b. Does the 45 litre recycling crate and weekly collection provide enough space for your household recycling?
  - c. Do you already separate out your glass for kerbside recycling collection?
  - d. What would help your household to recycle more products?
  - e. Tick all that apply. When you are purchasing products do you consider...
  - f. Should Council investigate putting in a range of Recycling Bins for public use in high-use areas?
- 3. Kawerau Transfer Station Plans
  - a. If there was no cost to drop recycling to the Kawerau Transfer Station would you sort and drop off your recyclables at the Transfer Station more regularly?
  - b. Tick all that apply. Did you know that you can drop off the following items to the Transfer Station?
- 4. Greenwaste and Foodwaste
  - a. Do you already compost food waste at home?
  - b. Do you already compost greenwaste from the garden at home?
- 5. Education and Communication
  - a. How do you want to receive information from Council?
  - b. What else could Council do to encourage recycling, and waste minimisation?
  - c. Do you support the Paper 4 Trees and Zero Waste Education Programs being provided to our Kawerau schools and preschools as part of the waste minimisation plan education?
  - d. Council plans to invest in waste minimisation education at our Kawerau Schools – do you support this?
- 6. Any other feedback

(Please note, all submitters are residents)

28	Alison Marshall	NO	<b>Q1.a.</b> Just myself <b>Q1.b.</b> Strongly Agree <b>Q1.c.</b> Being a good Kaitiaki   stewards for the environment <b>Q2.a.</b>  × Sauce bottles (number 4 plastic) <b>Q2.b.</b> Yes <b>Q2.c.</b> No <b>Q2.d.</b> More recycling options available kerbside, as per Kawerau District Council's plans, places to take more sorts of recycling to, an organised inorganic kerbside collection <b>Q2.e.</b> Price, If the packaging is recyclable and Quality so it will last a longer time <b>Q2.f.</b> Yes – as long as the public use them properly and the bins are cleared so contents don't build up, also to have at events and have people at the bins educating the public as they recycle <b>Q3.a.</b> Yes <b>Q3.b.</b> <ul style="list-style-type: none"> <li>Whiteware items</li> <li>Tyres</li> <li>Batteries</li> <li>Wood (treated and untreated)</li> <li>Clean concrete</li> <li>Clean fill and soil</li> </ul> <b>Q4.a.</b> No <b>Q4.b.</b> No <b>Q5.a.</b> More than one way recieved – No.1 option is Website and No.2 Newsletter printed and delivered to homes <b>Q5.b.</b> It is in the Plan - to EDUCATE the Kawerau public and especially the next generations on all aspects on how VIP recycling and reusing is, and for this process to try to engender a sense of community again, for the common good, caring for nature and each other. The retail sector to be looked at regarding non-recyclable packaging and allow customers to dispose of that packaging back to the store for the store to recycle it. A soft plastic recycling system would be useful (such as Woolworths in Whakatāne). Encourage Kawerau residents to care enough to pick up litter but then again where are the public rubbish bins to put that litter in? <b>Q5.c.</b> Yes <b>Q5.d.</b> Yes <b>Q6.</b> Recycle, reuse - REPAIR. In future be nice for all ages to have ways to learn how to reuse, rebuild, and relearn our No 8 wire and DIY skills (such as the Healthy Neighbourhood Scheme we had in Kawerau a few years back) - and leading to perhaps more local retail outlets selling reusable goods (as our current op shops do), Upcycling is now trendy for all the good reasons.

The dump is to expensive that's why illegal dumping is happening ratepayers should be given big discounts to dump their rubbish and out of towns pay full price maybe a rates card for Kawerau users.</p>

#	NAME	HEARING	SUBMITTERS' RESPONSE TO SUBMISSION TOPICS
46	Trish Brady	NO	<b>Q1.a.</b> Just myself
			<b>Q1.b.</b> Strongly Agree
			<b>Q1.c.</b> Future proofing the environment for many generations to come
			<b>Q2.a.</b>  × Pipes (number 3 plastic)
			<b>Q2.b.</b> Yes
			<b>Q2.c.</b> Yes
			<b>Q2.d.</b> Less plastic packaging at the supermarket and other retailers and for other things. More encouragement to reuse, repurpose etc. Teach people the skills to do such things maybe in night classes or weekend craft workshops etc
			<b>Q2.e.</b> Price, If the packaging is recyclable, ingredients for food products, and what chemicals are used in other products such as washing powder glues paint etc
			<b>Q2.f.</b> Yes but not at the pools (especially if it's for public use as that could be considered unsanitary ...,lol) as that could be considered unsanitary
			<b>Q3.a.</b> <i>Submitter did not have a responds to this question</i>
			<b>Q3.b.</b> <ul style="list-style-type: none"> <li>• Wood (treated and untreated)</li> <li>• Clean concrete for a fee</li> </ul>
			<b>Q4.a.</b> No
			<b>Q4.b.</b> No
			<b>Q5.a.</b> All above would be good coverage for everyone in town
			<b>Q5.b.</b> Maybe lobby shops to accept customers reusing their food containers, also encouraging customers to do this as well, as it might be something they hadn't thought of
			<b>Q5.c.</b> Yes
			<b>Q5.d.</b> Yes
			<b>Q6.</b> It's good to see the council considering these issues, and I hope you see it through even though you might not get much support for it. Maybe in considering the costs of shipping our rubbish elsewhere, the council could look into alternatives for dealing with it locally. At the moment the alternatives have their own set of problems, such as incinerator plants' air emissions and pollutants are ultimately self-defeating, the land (and people) need clean air and clean rain to nurture the soil for growing food, and there's enough people in town with respiratory problems due pollen and sprays etc, We don't need to add to that mix, but as technology improves, those sorts of plants could move to hardly any discharges, and the cost for running the plant could possibly offset the cost of shipping it out. This would also mean we take responsibility for our own stuff and not dumping it on someone else's whenua, or maybe it could be one of those projects where the councils work co-operatively in dealing with the scary amount of landfill that happens annually, everywhere. It would be good to keep the door open to possible solutions to these issues and not let set up costs stop us from doing it. Carry on. In the question about the transfer station if there was no cost for sorting and dropping off recyclables more regularly I would if I had a car, but I don't so I rely on the kerbside collection to take my rubbish to the dump. Thank you for your time, I look forward to seeing some of these ideas bare fruit

Just recycle. LET'S TALK "WASTE" Right now, I am more concerned just how many people Council employs. As a ratepayer and pensioner, I see our hard-earned money being wasted. An example. A worker in our streets spends many hours at home while he is supposed to be working. I have complained about this before just to be told "we have GPS on our vehicles" It is not unusual for him to spend the day, in hours at home. He seems to forget it is us the ratepayers paying his wages. Weekends, it is worse. He must enjoy flaunting his style to the neighbourhood. Everyone is talking about it. Another example, two trucks, five men took 25 minutes to plant one tree. You are putting rates up, going to make us pay for water, which is already covered in our rates. So, rates should come down. I would say about 80% of ratepayers are retired so you are targeting them. Not everyone has a bank full of money and lots are struggling, if it weren't for my family we definitely would not cope. We shouldn't have to ask family to help. But that's the position this Council is putting us in. Look at your Council "Mayor" and start cutting back. It's time for ratepayers to have a fair deal. An evening meeting should be made so we get to have our voices heard.</p>

Paper and combustibles</b>  Has any thought been given to the use of the great un-used resource at the old Norske Skog mill of the power boilers to burn paper and combustible refuse?  It may require a local investment company set up and require an investigation team to suss it all out etc. but with the modern methods of 'scrubbing' gases for discharge it's worth consideration.</p> <p><b>Re Use of Plastics</b>  There is someone already (in NZ I think?) melting down the waste plastics and turning it into posts. If waste geothermal steam available as an energy resource perhaps we could do the same and form a company to set up a district unit for the</p>

			<p>manufacture of marketable posts for the horticulture industry and perhaps, products for the building industry.</p> <p>I would imagine the biggest cost in that endeavour would be the energy required yet we perhaps have it to 'waste'</p> <p>Steel of course is presumably collected and sold to the metal dealer for NZ Steel.</p> <p>I don't see the Council doing all this as they have their own duties but perhaps, they could be the initiator or catalyst for the development of appropriate groups to investigate the feasibility of the ideas. groups could be formed 'outside' of Council from a mix of local volunteers and businesspeople who are lateral thinkers. I say volunteers so that those with ideas need to be there for the right reasons.</p> <p>We have two major underutilised resources in the district. The defunct power boilers and the geothermal steam. If we don't have the ideas and skills to capitalise on them then it is a waste in itself.</p>
